

## **Light The Way Back**

A plague and a war have wiped out a significant amount of the population. The government has strict rules, yet two young people sneak away from this dystopian world and break into an abandoned theatre. At first it seems dark and scary, but the two of them encounter historical artifacts like hand sanitizer, an iphone, and an old script that help them discover the magic of theatre and the importance of honoring their ancestor's legacies. Another thing they find is a ghost light, a symbol of the lives lost and of hope for the future. After 200 years untouched, the light still turns on to light the way for both the ghosts, and perhaps the next generation. A curfew siren sounds. Jamie goes to turn the light off as they leave, but with a new found appreciation of history and hope for the future Cam encourages Jamie to leave it on. They hope the light will never burn out and that theatre will last forever.
